Asset Tracking for Healthcare

VISION

Elpas
From Tyco Security Products

Identify, Locate and Track patients, guests, staff, and medical devices throughout your healthcare facility and campus

Vision Technologies and Elpas deliver active RFID/RTLS healthcare solutions for the protection and visibility of patients, staff and assets. The comprehensive range of solutions consist of infant protection, staff utilization, medical equipment management and wireless emergency call solutions for healthcare organizations.

The advanced field-proven solutions can suit every requirement, whether it be a large hospital or small nursing home where the real-time identification and location of staff, patients and assets are mission critical. The result: enhanced workflow, improved patient care and safety, improved resource utilization, audit trails to meet regulatory compliance and an overall reduction of operating costs.

One Solution, Multiple Applications

Elpas uses Triple Technology, Active Radio Frequency Identification (RFID), Real-time Location Systems (RLS) and Passive RFID to deliver Asset Management, Physical Access Safety, Security and Visibility products and solutions.

Protect Your People and Your Assets.

Request Vision's *Asset Tracking and RTLS* case study to learn how Elpas integrates with other technologies. For a demo in real time, contact Vision at 866-746-1122.

Asset Tracking for Healthcare

VISION

Infant Protection >

Wireless Temperature Monitoring >

Hospital Staff Protection >

Medical Asset Management >

Wireless Nurse Call >

Wondering Patient Protection >

^ Hand Hygiene Monitoring

Solutions:

Wireless Nurse Call

- ▶ Protects patients anywhere in the facility
- ▶ Enables patients to feel safe and secure
- ▶ Streamlines workflow; reduces operating costs
- ▶ Generates staff-specific patient call logs

Hand Hygiene Monitoring

- ▶ Reduces the rate of healthcare acquired infections
- ▶ Monitors adherence to hygiene compliance policies
- ▶ Generates reports per caregiver/ examination room
- ▶ Helps identify the source of an infection outbreak

Hospital Staff Protection

- ▶ Protects lone workers and employees at risk
- ▶ Enables staff members to feel safe and secure
- ▶ Supports hard-wired or wireless call-points

Medical Asset Management

- ▶ Enhances asset optimization; prevents asset shrinkage
- ▶ Streamlines workflow; reduces operating costs
- ▶ Improves regulation compliance

Infant Protection

- ▶ Guards against abductions and mother/baby mismatches
- ▶ Enforces accountable match test discharge procedure
- ▶ Prevents unauthorized movements or transfers of infants
- ▶ Continuous baby supervision
- ▶ Provides peace of mind for parents and maternity staff

Wandering Patient Protection

- ▶ Protects against patient wandering or elopement
- ▶ Maintains patients' freedom and independence
- ▶ Continuous patient supervision
- ▶ Provides peace of mind for families and medical staff

Wireless Temperature Monitoring

- ▶ Monitors assets/ environments that require temperature range compliance
- ▶ Prevents spoilage of temperature sensitive assets
- ▶ Reduces labor costs associated with manual monitoring & logging procedures
