

Cabling

Structured Cable Plant Systems

Vision Technologies' full-service structured cabling division specializes in providing commercial and industrial Information Transport Systems with BICSI RCDD design personnel and BICSI-certified installation staff. Our experience with technology and project management allows us to provide the highest levels of service and quality at extremely competitive rates. As a member of the BICSI Corporate Connections Program, Vision Technologies maintains a staff of RCDDs, BICSI-certified TPMAs, as well as BICSI-certified Technicians and Installers.

Our cabling division offers a comprehensive range of products and services which are delivered on a nationwide basis. From the design of the structured cable system to installation, testing and documentation, Vision's engineers can provide the services you need to be successful. Our capabilities enable us to provide voice/data/video cabling systems transmitting up to 10G to the desktop. Our data center infrastructure services include detailed engineering to complete installation build. All of our Data Center projects are delivered in accordance with TIA-942 - "Telecommunications Infrastructure Standard for Data Centers."

Additionally, all personnel receive mandatory on-going education through classes and seminars, in order to keep pace with our rapidly changing environment. Certifications from major manufacturers enable Vision to provide cable plant installations warranted for up to 25 years! Not only are parts and labor covered but the manufacturers warrant the ability of our installation to support your applications!

Our experience in supporting large installations is evidenced by our reference sites. Our attention to detail and best practices for installation allow us the ability to deliver world-class turnkey systems in virtually any type of installation environment. We have created a successful business model with the emphasis on being the company behind the company.

ON-SITE SUPPORT

Vision Technologies offers on-site support services for any level of service required. Service contracts can be arranged to meet any set of skills, service levels, response times, and technologies. Vision Technologies personnel can be dedicated to your operation or be just a call away.

Vision Technologies provides on-site support for:

- ▶ Cabling Technicians
- ▶ Moves/Adds/Changes
- ▶ Remedial Maintenance
- ▶ BICSI-certified RCDDs
- ▶ Network Support
- ▶ End-user Support

Our team of project managers, certified infrastructure engineers, RCDDs, networking consultants, and cabling experts work together to offer the full suite of networking solutions. A Vision Technologies Project Team focuses on every aspect of a technological build-out, including:

- ▶ Physical Layer
- ▶ Inside and Outside Plant
- ▶ LAN and WAN Circuits
- ▶ Intranet and Internet
- ▶ Automation
- ▶ Multimedia Entertainment Systems and Applications

Vision Technologies specializes in structured cable plant installation, support and engineering. Certified by major cable manufacturers, Vision can provide systems with applications warranties up to 25 years. Let our trained personnel help you meet all the needs of your business and provide you with rock-solid, low-voltage infrastructure for voice, data, video, CCTV, access control and building automation systems.
