

Professional Services and Cybersecurity

Expertise You Can Rely On

Vision Professional Services specializes in IT systems integration, as well as, the implementation and sustainment of secure, high-availability IT environments. We have the strategic, technical, and functional expertise to help government agencies cost-effectively protect their information infrastructure. Our security services focus on the preservation of confidentiality, integrity of data, and availability of network resources.

Sampling of Past Performance Projects:

Department of Defense (DoD) – Cybersecurity

Vision implemented a systematic framework for information assurance vulnerability management to address a serious backlog of Information Assurance Vulnerability Alerts (IAVAs). At the outset, there were 11,310 unpatched and un-remediated vulnerabilities across the entire enterprise. Slowly, steadily, and surely – Vision chipped away at the backlog and had decreased its level by 90 percent after only a year.

Well-Known Manufacturer of Motor Vehicle Parts, Accessories and Stampings – Cybersecurity

Vision refreshed an aging Cisco wireless infrastructure, delivered Aruba ClearPass guest access via self-registration Guest Services, and implemented Network Access Control (NAC) – both wired and wireless – to multiple facilities throughout the United States, Canada and Mexico (Americas).

U.S. Securities and Exchange Commission – IT, AV and Professional Services (Headquarters and Regional Locations)

We provide consistency in design to reduce costly change orders, ensure efficiency and timeliness of design/install resources, all to meet the SEC's Office of Information Technology (OIT) requirements. The SEC also entrusted Vision to deliver complete expert design and installation services in all SEC locations. Recently, Vision was awarded five task orders with a ceiling of \$60 million.

LARGE SYSTEMS INTEGRATOR PARTNERSHIPS

- ▶ SAIC
- ▶ GDIT
- ▶ Leidos
- ▶ Lockheed Martin
- ▶ CSC/RA at EPA

CYBERSECURITY CAPABILITIES

- ▶ Network Security
- ▶ Security Operations Center
- ▶ Enterprise Security Management
- ▶ Disaster Recovery and COOP
- ▶ Firewall Administrations
