Collaboration & Presentation

Our Approach & Benefits

Vision Technologies strives to understand our clients' challenges and goals through an on-site assessment and proposal process customized to meet their specific needs. We tailor our designs and systems offerings to fit within a range of budgets to include smaller personalized software options up to large-scale boardroom and telepresence systems.

Features

- ▶ Scheduling is easy-no IT support required.
- ▶ Launching a meeting is as simple as making a phone call.
- ▶ In-room controls are intuitive.
- ▶ Collaboration applications are plug and play.
- ▶ People appear lifelike and life-size.
- ▶ Participants can meet in many rooms at once-up to 48 locations in one meeting.
- ▶ Users can meet, record high-quality video, or participate in impactful special events.
- ▶ Users can easily bring in collaboration applications like WebEx.
- ▶ Existing SD or HD video conferencing systems can be easily integrated.

Improve response time by connecting at a moment's notice with customers, partners, and co-workers

Make the right resource available at the right time in the right location

Build trust, understanding, and relationships across distances and cultures

Foster innovative collaboration by having stakeholders sit at one virtual table

Speed time to market by making decisions faster and smarter

Make your organization "greener" by using technology more effectively and traveling less

Vision Technologies can create a live, face-to-face communication experience over the network that empowers you to collaborate like never before. Our telepresence systems help people meet, share content, create high-quality video recordings and events, consult with experts and deliver powerful personalized services, all using the power of the network for an immersive in-person experience.

Experience real-time, face-to-face communication and collaboration with colleagues, prospects, and partners, even if they're in opposite hemispheres.

We live in a world of paradox. Technology has allowed us to establish business operations worldwide. However, to excel in today's fast-moving business environment, you have to interact and collaborate with co-workers, partners, and customers all over the world at a moment's notice.

At the same time, business still depends on the quality of your relationships with the people with whom you interact most often. To build and maintain these critical relationships, you often need to travel, which means reduced productivity as well as valuable time spent away from home and family.
