

Secure Your Stimulus Funds And Your Network's Future

COVID-19 changed our education delivery model overnight. An increasing number of hybrid/remote classrooms has placed unprecedented demands on network infrastructures and budgets. To help educators continue to serve students during the pandemic, the U.S. government created the Education Stabilization Fund (ESF) as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020.

As of 1HFY21, a significant amount of funding remains unspent. While the government has approved higher education funding, understanding the law and accessing these stimulus funds can be a confusing process.

Vision and CommScope are here to help through our RUCKUS Funding Support Program. CommScope offers free consultative support ensuring Institutions of Higher Education (IHEs) secure the funding they need in order to tackle these new connectivity demands now and to prepare for a post-pandemic world.

Benefits of CommScope's RUCKUS Funding Support Program:

- ▶ **Identifying funding sources.** CommScope has partnered with a national grants development services firm to provide custom funding reports that help you understand what funds are available.
- ▶ **Navigating the application process.** CommScope's RUCKUS Funding Support Program guides you through the application process, helping you to secure and maximize grant funds.
- ▶ **End-to-end support.** CommScope's dedicated RUCKUS team is trained and ready to support businesses and communities in accessing public funding and help answer all their questions.

VISION TECHNOLOGIES
MAKING VISION REALITY

Funds Supporting Technology In Higher Education

The coronavirus pandemic has forced IHEs to become extremely creative, quickly devising new ways to deliver education in the face of unprecedented obstacles. With help from the ESF, colleges and universities can implement fast, secure and reliable network technologies, touchless visual communication and collaboration and physical security solutions to protect the health and safety of students, faculty and staff.

To meet the steeper networking demands the CommScope RUCKUS portfolio of Wi-Fi solutions offers:

High-density indoor-outdoor networking solutions. We can help your network meet capacity challenges in a cost-effective manner. Due to the pandemic, Wi-Fi connectivity is now demanded in places that it was not needed before. RUCKUS access points provide secure, reliable and economical access in the toughest indoor and outdoor environments.

Network scalability. We make it easy to grow your network at every level, from the AP to your core switching, while offering a cloud-managed solution that supports a wide range of Wi-Fi 6 (802.11ax) and Wi-Fi 5 (802.11ac) APs and ICX switches to meet the most demanding requirements.

Commitment to our customers. We believe in the value of community. Through initiatives like our wireless Rapid Deployment Unit, our RUCKUS and Vision experts deliver safe, reliable high-speed Wi-Fi, or other wireless networks; providing ad hoc connectivity in a range of environments.

Get Started Today!

Contact Vision and CommScope's RUCKUS Funding Support Program experts at info@visiontechnologies.com.

Get Connected

Seamlessly connect anyone, anywhere, anytime, & on any device – securely & reliably.

Integrated Technology Delivery

Enhance your project's ROI while delivering it faster!

Managed Services Center

Choose from our flexible suite of 24/7 support, maintenance & monitoring services.
