Wi-Fi Solutions

Vision Technologies provides integrated networking and mobile technology solutions focused on the customer experience. Our solutions architects and engineers will ensure your infrastructure design includes the right mix of coverage, capacity, redundancy and security to deliver an exceptional customer experience.

Vision has tremendous depth and breadth in enterprise mobility. Vision designs, installs, and provides post-implementation support for Wi-Fi solutions that enable enterprises to seamlessly connect anyone, anywhere, anytime, and on any device — securely and reliably.

▶ Network Assessments	▶ Internet-of-Things (IoT)
▶ Wireless LAN Surveys	▶ Cybersecurity Solutions
▶ Predictive Design	▶ Network Access Control (NAC)
▶ Enterprise LAN & Wi-Fi Infrastructure	▶ Indoor/Outdoor Wireless
▶ Software-Defined Networking (SDN)	▶ Point-to-Point Wireless
▶ Guest Access Solutions	▶ Real-Time Location Systems (RTLS)

Secure Communications: The rapid advancement of technology enables organizations to derive value from improved decision making, new competitive advantages, improved profitability, and innovation. However, it also means facing a barrage of constantly evolving cybersecurity threats. Luckily, advances in wired and wireless technologies have resulted in faster and more secure communications that support Guest Access, Facilities Monitoring of IoT devices, and a robust security offering for onboarding edge devices through policy and user management. Vision can help you to face these threats with our comprehensive solutions and post-implementation support.

Wi-Fi Solutions

Reliability and Flexibility in Secure Environments

Management of the entire network and Wi-Fi portfolio in a secure environment ensures that sensitive data is protected against rogue operators and cyber intrusion. The suite of products and services from Vision Technologies spans a wide array of solutions focused on reliable, robust, and secure communications

Reliable: We provide a 100% customer experience guarantee with our lifetime craftsmanship warranty across the full spectrum of solutions. Every In-Building Wireless system is designed utilizing the latest industry standard Ekahau and iBwave software by certified in-house professionals.

Trusted Advisor: Vision is your trusted advisor with extensive experience and is certified across every major network/Wi-Fi manufacturer. These relationships ensure that, regardless of the system, Vision can design, install, and integrate the system, ensuring that security for guests and customer users is paramount.

Scalable: Scale is paramount and our ability to compress schedules and deliver more than is expected helps the end user realize their ROI sooner rather than later. Our modular and flexible designs create a system that is easily expandable as the footprint increases. Our experience with overlaying other technologies such as, CBRS, Building Management Systems (BMS), DAS, and IoT reduces the number of systems and integrators responsible for the successful implementation of all of your systems.

Proven: Vision has successfully implemented hundreds of facilities for all facets of Route/Switch Networking, Wi-Fi, Cybersecurity, and IoT. Our knowledge of Wi-Fi, coupled with our Integrated Technology Delivery (ITD®) methodology, helps ensure that the installation and integration is accomplished with expertise and proficiency. Our integration crews that are currently installing fiber infrastructure, conveyance, and other systems, are the same teams conducting the physical installation of the Wi-Fi infrastructure. These skilled individuals are directly linked to Vision's in-house iBwave, Ekahau and NetScout Design Engineers, Solutions Architects, and Engineering resources for successful, seamless implementations.

Using our broad portfolio of manufacturers ensures that our customers receive the best possible solution. Our suite of products and services, along with our maintenance and monitoring services, brings added value to our complete installation and post-implementation support offering.

The Wi-Fi Experience

Seamlessly connect anyone, anywhere, anytime, & on any device – securely & reliably.

Integrated Technology Delivery

Enhance your project's ROI while delivering it faster!

Managed Services Center

Choose from our flexible suite of 24/7 support, maintenance & monitoring services.
