

Audio Visual Solutions

Audio Visual Solutions

Vision is uniquely positioned to help you optimize your audio visual experience with an integrated communications approach that blends art and science.

The art is in the design of the experience — visualization, collaborative workflow, presentation and ease of use. The science is in the integration of technologies that make it happen.

Vision has a team of AVIXA-certified engineers, project managers and technicians committed to transforming what would otherwise be difficult, costly, and unpredictable, into a low-stress, cost-effective experience.

Our Integrated Technology Delivery (ITD®) methodology works to deliver a wide range of business solutions, including board and huddle rooms, training facilities, network operations centers, conferencing facilities, and public venues.

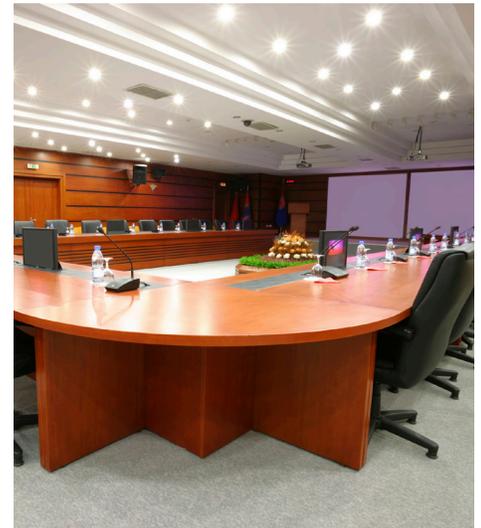

- ▶ Video Teleconferencing
- ▶ Audio Conferencing

INDUSTRY PARTNERS

Collaboration & Presentation

Our Approach & Benefits

By providing an extensive portfolio of products, services and solutions designed to simplify the project life cycle, Vision's Audio Visual Systems Practice concentrates on customized offerings in the commercial, educational, healthcare, and government environments. We are committed to gaining a detailed understanding of the critical challenges and obstacles. We conduct a personalized needs assessment to better define and craft the best possible solutions for each customer.

Our goal is to provide the best possible solution within a given budget that not only meets but exceeds our customer's expectations. We offer comprehensive expertise in not only Audio Visual systems and integration, but also in network and IP configuration related to Unified Communication & Collaboration (UCC), Video Conferencing (VTC), and other IoT and IP-enabled components. We have the resources to respond to larger opportunities across a national footprint while providing the more personalized service of a smaller business.

Control Systems

- ▶ Full control at your fingertips
- ▶ Rich sound & vivid images for any environment
- ▶ AV, lighting, shading, IT, security, BMS & HVAC

Presentation Systems

- ▶ Systems designed to adapt to ever-changing technologies
- ▶ Latest projection technology, video conferencing & telepresence solutions
- ▶ Digital signage & advanced messaging systems

Unified Communications & Collaboration

- ▶ Connect, share & collaborate with anyone, from anywhere
- ▶ UCC solutions for healthcare, education, manufacturing, financial services & government
- ▶ Conference rooms, personal workspaces, huddle rooms

Background Music & Sound Masking

- ▶ Future proof & failure proof
- ▶ Simple overhead paging applications to advanced paging & voice evacuation systems, spanning multiple zones & structures
- ▶ Unprecedented flexibility, scalability, intelligibility & reliability

Customer Experience

We craft unparalleled AV & UCC workplace experiences.

Integrated Technology Delivery

Enhance your project's ROI while delivering it faster!

Managed Services Center
