

Information Transport Systems

Integrating Technologies Over the Network

Vision integrates technology across an entire spectrum of support services and we are committed to the success of the design-build process. Structured Cabling is a way of managing and utilizing your enterprise building's connectivity for applications such as Passive Optical Networks (PON), Data Center Services, Wireless Networks, Wi-Fi, LED Lighting and Audio Visual Systems.

It all starts with our Integrated Technology Delivery (ITD®) methodology. As a part of our ITD® implementation, structured cabling creates a smart, easy-to-manage network infrastructure that meets your current operational requirements and enables you to move, add, replace or enhance any part of your network at any time without causing unnecessary downtime or interruptions. Properly designed structured cabling also helps minimize OpEx and future installation costs.

- ▶ Structured Cabling
- ▶ Network Cabling Design
- ▶ Passive Optical Networks
- ▶ Data Center Services
- ▶ Fiber Optic Cable Installation
- ▶ Unlimited Bandwidth Potential
- ▶ Moves, Adds, & Changes
- ▶ Wireless Networks
- ▶ Distributed Antenna Systems (DAS)
- ▶ Audio Visual Systems
- ▶ Security
- ▶ LED Lighting
- ▶ Reduced CapEx & OpEx
- ▶ OSHA 10 & 30 Certified

Information Transport Systems

Our Approach & Benefits

Technology Infrastructure is the catalyst for functioning network devices. With centralized program management and established relationships with delivery partners, Vision's certified team of experts deliver solutions nationally that meet business requirements, budgets, and timeline.

Our goal is to provide transparency throughout the entire customer experience. Utilizing proven processes and methodologies, Vision's dedicated project managers establish customer expectations and deploy solutions based on industry best practices. Our proprietary In-Process Quality Control (IPCQ) application provides accurate real-time status updates and reporting. With 100% Customer Satisfaction Guaranteed, Vision is committed to being your single-source for multi-site and multi-service rollouts.

Structured Cabling/Infrastructure

- ▶ Information Transport Systems with BICSI RCDD design personnel and BICSI-certified installation staff
- ▶ From the design of the structured cable system to installation, testing and documentation, Vision's engineers can provide the services you need to be successful
- ▶ Voice/data/video cabling systems, and unified communications systems

Data Center Infrastructure Nationally

- ▶ Detailed engineering to complete build out and installation
- ▶ Copper, fiber, pre-terminated plug & play solutions, cabinets, racking trays, cold aisle containment, & cage installation
- ▶ Complete design/engineering/build

National Delivery

- ▶ Rollouts, site surveys, installations & on-site field support
- ▶ Custom delivery based on client's needs
- ▶ Experienced, pre-screened technicians in all 50 states & Canada

Passive Optical Network (PON)

- ▶ Innovative fiber-based solutions for enterprise local area networks
- ▶ Simplified enterprise network deployment, operation, and management
- ▶ Enhanced security, carrier-class reliability, and significant green operational savings

The Infrastructure Experience

Networking infrastructure solutions built for the customer experience.

Integrated Technology Delivery

Enhance your project's ROI while delivering it faster!

Managed Services Center

Choose from our flexible suite of 24/7 support, maintenance & monitoring services.
