

# Mobility Solutions

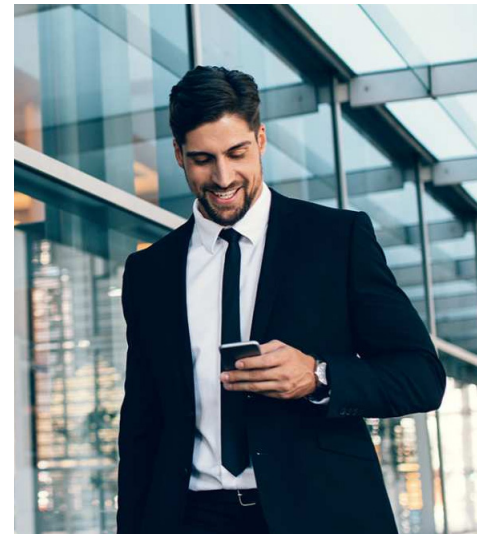

## Secure Mobile Solutions

Vision provides integrated networking and mobile technology solutions focused on the customer experience.

We recognize that unshackled by physical boundaries, wireless communication facilitates agility and productivity in exciting new ways. Today's wireless enables new and innovative approaches to engage and protect employees, consumers, and IoT devices including enterprise, BYOD, guest assets, medical, and industrial.

Vision has tremendous depth and breadth in enterprise mobility. Vision designs, installs, and provides post-implementation support for borderless network solutions that enable enterprises to seamlessly connect anyone, anywhere, anytime, and on any device - securely and reliably.

- ▶ Network Assessments
- ▶ Cybersecurity Posture Assessments
- ▶ Wireless LAN Surveys
- ▶ Predictive Design
- ▶ Enterprise LAN & Wi-Fi Infrastructure
- ▶ Software-Defined Networking (SDN)
- ▶ Guest Access Solutions
- ▶ Internet-of-Things (IoT)
- ▶ Cybersecurity Solutions
- ▶ Network Access Control (NAC)
- ▶ In-Building Wireless Solutions
- ▶ Outdoor Wireless
- ▶ Point-to-Point Wireless
- ▶ Cellular DAS
- ▶ Public Safety DAS
- ▶ Real-Time Location Systems (RTLS)

# Mobility

## Focused on the Customer Experience

Vision has unique expertise spanning the latest Wi-Fi 802.11, cellular LTE, 5G, and public safety technologies and standards. Our solution architects and engineers will ensure your infrastructure design includes the right mix of coverage, capacity, redundancy and security to deliver an exceptional customer experience.

We've been designing and installing In-Building Wireless (IBW) solutions for over a decade. From the routing, switching, and software-defined network infrastructure to the Wi-Fi, Cellular Distributed Antenna Systems (DAS), and Public Safety DAS solutions connecting your mobile devices and the cybersecurity that protects them, we can handle your most challenging mobility projects, enabling you to achieve your business objectives.

## Enterprise Network Infrastructure

- ▶ Architect, build, & support enterprise LAN/WLAN solutions
- ▶ Support data, voice, & video communications with one integrated network
- ▶ Scalable, secure SDN & SD-WAN solutions built for the enterprise & the rise of IoT

## Cybersecurity

- ▶ Secure wired & wireless network & IoT assets
- ▶ Secure identity & access with policy enforcement & analytics
- ▶ Next generation firewalls, IPS, endpoint security, enterprise segmentation, vulnerability & event management

## Cellular DAS & Small Cells

- ▶ Assess, design, build, & support cell DAS & small cell solutions
- ▶ Carrier coordination to secure proper approvals & commission
- ▶ Robust, reliable and carrier-approved neutral host solutions

## Public Safety DAS

- ▶ Assess, design, build, & support public safety DAS system for emergency or enterprise safety communications
- ▶ Ensure compliance with jurisdictional public safety regulations
- ▶ FirstNet solutions

## Get Connected

Seamlessly connect anyone, anywhere, anytime, & on any device – securely & reliably.

## Integrated Technology Delivery

Enhance your project's ROI while delivering it faster!

## Managed Services Center

Choose from our flexible suite of 24/7 support, maintenance & monitoring services.

## Certified Engineers
